## Awards Made Thursday At Junior Grain Club Fair

The Acme and Carbon Junior Grain Clubs competed Thursday of last week in the junior grain club fair held in the Scout hall, Carbon, under sponsorship of the Carbon Community Club. Mr. R. Garrett was chairman for the day. Mr. William MacDonald of Grainger, president of the Drumheller District Agricultural Society, gave the opening address and pointed out that a good junior club member will make a good citizen.

Mr. E.E. Birdsall, supervisor of crop improvement, Alberta Department of Agriculture, judged the Carbon entries and gave the following placings: 1st, Marjorie Leiske; 2nd, Daunavan Buyer; 3rd, Phyllis Schuler; 4th, Morley Buyer; 5th, Edward Cannings; 6th Bobby Metzger.

In his talk Mr. Birdsall stressed the importance of clean seed grain and said that many farmers unknowingly plant grain containing a large percentage of weed seeds. He strongly recommended the use of mercuric dust in treating grain, concluding his remarks by praising the good work done by the Carbon club and urged that they continue to do as well in the future.

Mr. C.L. Usher, assistant supervisor of junior clubs, judged the Acme exhibits. He gave a brief discussion on each and presented ribbons to the following winners: 1st, Bruce Pearson; 2nd, Lyle and Delmas Haining; 3rd, Ken and Robert Boake; 4th, Robert Van Wart; 5th, Delroy and Jim Bates; 6th, Ray and Albert Hannah.

Mr. Usher also presented ribbons to the Carbon club winners. Thematic displays featured farm safety. Mr. Usher complimented both clubs on their displays and awarded first prize in this competition to the Acme club.

Mr. N. F. Bell, district agriculturist, congratulated the clubs on their achievements. He stressed the importance of team work by members of junior clubs to enable the club to win top honors in competition.

Mr. Harlan and Ken Waddle, Alberta junior grain club champions for grain judging in 1950, who will represent Alberta at the Toronto Royal Winter Fair, gave brief talks on their achievements.

Mr. Ed Ness of the Alberta Wheat Pool pointed out the educational value of junior grain clubs and gave several examples in this respect. Short talks were given by Mr. R. Bates of Acme and Mr. J. A. Ohlhauser of Carbon. Mr. Bell gave the closing address.

W. D. Gentleman of the Kneehill Agricultural Service Board assisted in the day's achievements.

The Carbon Home and School Association held its first meeting on October 17. Thirty-four members were present and the association feels that a good beginning has been made. Its aim is 100 per cent membership of all parents and those interested. It is hoped to have Mr. Watkin as guest speaker at the November meeting. Watch for the date!

## No Trace of Whooping Crane In Northwest

Seen In Saskatchewan

EDMONTON—A 2½-month aerial probe of the Yukon by an Edmonton wildlife expert has failed to reveal a trace of North American's mystery bird, the whooping crane.

J. D. Soper, Dominion Wildlife Officer for Alberta, returned to Edmonton after joining officials of the Yukon Territorial Government in a hunt for the birds.

The party covered several thousand miles by air, flying almost the whole distance at 100 to 400 feet heights to observe closely the areas where whooping cranes might nest.

No trace of the birds was visible. Indians and Eskimos who live in the territory reported that cranes had not been seen in the area.

Whooping cranes, once fairly common in Alberta and other prairie provinces, now are almost extinct and only 34 birds are believed to exist on the whole continent.

They winter in the southern United States and migrate north, but location of their summer nesting grounds is a mystery despite prolonged searches by naturalists.

REGINA — At least five Saskatchewan residents have seen whooping cranes flying south this fall, the provincial museum reported.

Fred Bard, museum curator, is in charge of a census of the crane in Canada, which is being conducted by the Audubon society of New York and the U.S. Fish and Wildlife service.

## Calves Sold For 34 Cents a Pound At Fall Show

SASKATOON — Calves sold at a high of 34 cents a pound and yearling steers for a high of 27½ cents at the fall feeder show and sale at union stock yards here.

Auctioneer Jack Durno of Calgary sold about 50 per cent. of the 325 heads to buyers from Ontario. Buyers from Winnipeg also took the odd lot.

Top price paid for sheep, 20 head of breeding ewes and lambs owned by Sterling Wallace of D'Arcy, Sask., was 23 cents a pound.

## Cats Maul Rat

EDMONTON—Cats have joined in Alberta's rat defence campaign. A rat, almost dead after being badly mauled by cats, was found recently at Sibbald, west of Alasko on the Alberta-Saskatchewan border.

Mississippi is sometimes known as the Bayou state.

## To Try Out New Nickel Process

VANCOUVER — Sherritt Gordon mines will use a new nickel-producing process perfected by Prof. Frank Forward, head of the metallurgy department at the University of British Columbia.

Reported cheaper than any in common use today, the process will be brought into commercial use at Sherritt's Lynn Lake, Man., site in 1953.

In the new process, nickel concentrate is dissolved in ammonia. The solution is then treated chemically to recover copper, nickel and cobalt separately.

With the present process used in Canada, nickel is smelted and subjected to chemical treatment which separates copper from nickel. Copper, nickel and cobalt then are produced by electrolysis.

Pigs raised without access to soil may contract anaemia through iron and copper deficiencies.

## Crop Protein Content About Average Level

WINNIPEG—Preliminary estimate of the average protein content of this year's prairie wheat crop is 13.9 per cent, the Board of Grain Commissioners' laboratory reported.

The laboratory said a decrease to about 13.6 per cent.—the average

level for the last 20 years—is expected when more data, covering low protein areas in the north, are included in the completed survey.

Average protein content last year was 13.5 per cent.

## MANY THEATRES

There are 90,997 motion picture theatres in the world, with a total seating capacity of 48,750,147.

Year in year out quality has always been and will always be the first consideration with

# "SALADA" TEA

## Funny and Otherwise

Barber (whispering to the apprentice): "Here comes a man for a shave."

Apprentice: "Let me practice on him."

Barber: "All right, but be careful and do not cut yourself."

Professor—What is your idea of civilization?

Student—It's a good idea. Somebody ought to start it.

Sergeant (calling roll)—Private Jones!

Voice—Absent!

Sergeant—Quiet! Let Jones answer for himself.

Mother—What are you doing in front of that mirror?

Jimmy—I want to see how I look with my eyes shut.

"Who settles where you and your wife will go for your holidays?" "I do, of course. She says where she'd like to go and I say, 'Right! That's settled.'"

The country dance floor was jammed to the four walls and after one number a gallant youth said to a young lady beside him:

"Thanks so much for the dance."

"Dance? Dance?" she queried aghast. "Why I was just pushing through the crowd to reach the refreshment stand."

# British Battle for Malaya

Guerrillas Have Waged Small-Scale War For 28 Months

By WALTER BRIGGS  
(CPC Correspondent)

In the jungles of Malaya British troops are getting a taste of the mean sort of war that could face Canadian and other anti-Communist troops if the U.N. policy of containing Communism has to be backed up with arms in Southeast Asia.

The Tommies are learning that to cope with organized guerrillas, few though they may be, is not child's play. It's the toughest kind of war.

Both Tommies and U.S. soldiers have, to be sure, fought in jungles before. They clashed with the Japanese in the dense undergrowth of New Guinea and Burma and a score of other places. But these battles generally were positional: a town or territory was at stake.

In Malaya about 24,000 British troops, supported by Royal Air Force and Navy and about 70,000 native police, for 28 months have tried to knock out about 5,000 Communist guerrillas.

The Reds are still at it, though their strength has been whittled in half. Often they take the initiative. British forces and the authorities have paid with about 3,000 casualties. The campaign is costing about \$150,000 daily.

From hidden lairs in the jungle the guerrillas stab out at night. They mine a railroad, sack a village, murder a planter. Quickly they fade into the jungle.

They do this in the name of a "people's republic that they hope to set up in Malaya."

Malaya, which dangles off continental Asia, is about the size of New York state. Its population is about 5,000,000.

Why, with heavy military commitments elsewhere, should Britain involve herself deeply in Malaya? Why not give up this peninsular territory as she has given up India and Burma?

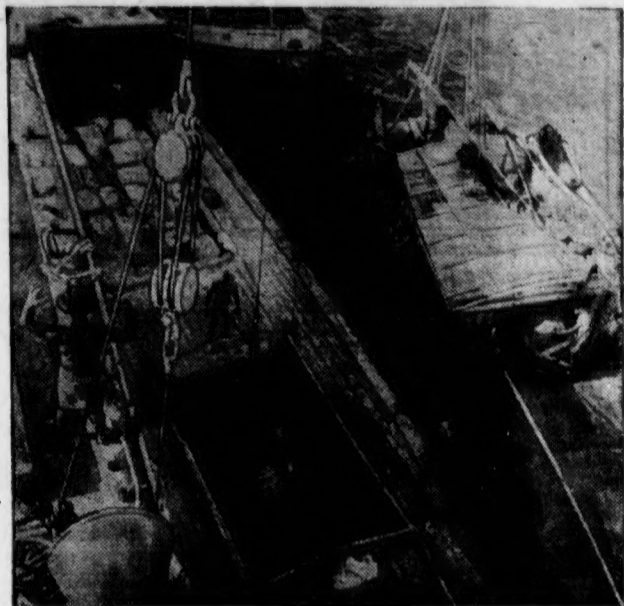

One answer is that Britain feels that the Malaysians are not yet ready for independence. She is trying to prepare them for it.

A second is that Malaya produces tin and rubber. These two raw materials, with rubber paramount, bring in more precious U.S. dollars than all the manufactures of the United Kingdom.

Britain and the West need the rubber and tin for stockpiling against the hazard of another great war. And Britain needs the dollars they earn to build up her war-torn economy.

The Communist battle cry is for freedom. But it is a synthetic cry as far as most Malaysians are concerned. The majority believes that Britain is acting wisely by preparing the country for independence gradually.

On orders from the Kremlin, the Communists struck in Malaya in May, 1948. Their uprising was the second in a chain of revolutions plotted at an international Communist

Malayan crude rubber hoisted aboard ship for delivery to United States. It means more U.S. dollars for Britain's treasury.

conference in February that year at Calcutta. Others occurred in Burma and Indonesia.

In the face of increasing destruction and bloodshed, Britain several months ago sent to Malaya Lt. Gen. Sir Harold Rawdon Briggs, an experienced soldier, to direct operations against the Communists.

He conceived a plan: his forces would roll up the peninsula from south to north, eliminating every vestige of Communist guerrillas as it advanced. It is too soon to evaluate results. But, with the jungle as an obstacle, the going will be rough. About four-fifths of Malaya is jungle.

Fighting the guerrillas calls for long treks through terrain that makes progress irritatingly slow. Air drops are necessary, but here again the jungle is frustrating. Supplies often are lost amid it—to be found, if at all, only after hours of searching.

The biggest single factor in Malaya's Communist dilemma is her Chinese element, which makes up nearly half the population of the Federation of Malaya. Almost all the Chinese are opposed to the Communists. "We're heartily with you," Chinese leaders say to the authorities.

But the Chinese, traditionally indifferent to civic responsibility, fail as a whole to co-operate actively in the anti-Communist campaign.

Almost all of the Malayan Communists are Chinese. They could not survive without co-operation from

fellow Chinese. The Communists call on them to supply food and shelter, and intelligence on British troop movements. They slaughter those who refuse to co-operate.

About 500,000 of the Chinese live as squatters on public land, where they fled during the war to escape Japanese barbarism.

Through their enforced co-operation with the Reds, the squatters are menacing all Malaya. To combat this menace, the British have had to be cruel. "We're sorry about it," British officers say, "but this is war."

Those found guilty of co-operating with the Reds are deported or executed. Whole villages have been put behind barbed wire.

At high cost in money and lives two valuable lessons are being learned from the war in Malaya.

One underlines what began to be understood during World War II when Russian peasants stabbed the Germans from the rear and Chinese peasants, hitting and running, harassed the Japanese. Guerrilla warfare is terrifically effective. With the magnificent cover of a jungle this effectiveness is increased many times.

The other lesson is that this kind of war can be carried out at small cost—in lives, money and material.

What is the Kremlin's investment in Malayan terrorism? No money, as far as is known. No material—most of the arms come from looted and left-over wartime stocks. Not even Russian lives, for the fighters are all natives.

## A JOB AT HERDING REINDEER

(From Northern Administrations Branch of Department of Resources and Development)

During the last week of July, the corrals at the north end of Richards Island near the mouth of the Mackenzie river were again the scene of the annual roundup of the main government reindeer herd. Further roundups were held in August to count and classify the reindeer in two herding units under native management located in the coastal area on the mainland near the Eskimo Lakes.

The results of these roundups as reported by wireless and mail to the Northwest Territories Administration, Ottawa, showed a total of about 7,500 animals of which nearly two-thirds were in the main herd, with about 950 in one native herd and 1,600 in the other. These totals included the fawn crop of 1950.

The herds were in good condition, free from any serious disease, and maintained under control by Lapp and Eskimo herders under government supervision.

The Canadian government is continuing its effort to establish reindeer herding as an industry for the natives of the northern regions of Canada.

The history of this enterprise goes back to the last decade of the nineteenth century when small groups of reindeer were brought by the United States government from Siberia to western Alaska to relieve destitution among the natives there.

By the end of 1929, arrangements were made with an Alaskan reindeer company to deliver a herd of 3,000 reindeer to a range near the mouth of the Mackenzie river. The drive from Alaska began in December of that year. Many difficulties were encountered and many problems arose pertaining to communication and supply in crossing the mountains of northern Alaska and the bleak coastal plain to the Mackenzie Delta. Some of the reindeer broke away and returned to their home range. Blizzards, intense cold, straying, accidents, and the depredations of wolves delayed progress.

Heavy losses to the herd were sustained but were recouped to a large extent by the fawn crop each year.

The reindeer arrived in Canadian territory in 1933, but completion of the trek was delayed by the unusual difficulties of moving the herd to the east side of the Mackenzie river. A herd of 2,370 animals was finally delivered on March 6, 1935.

In 1933, the Reindeer Protection Ordinance was enacted and an area of 6,600 square miles on the east side of the Mackenzie Delta was set aside as a reindeer reserve. Buildings were erected for the accommodation of reindeer staff and supplies. The main reindeer station was situated on the east channel of the Mackenzie river.

The reindeer staff had a nucleus of white men and Laplanders for supervision and training. Young Eskimos are employed as apprentice herders. More than 100 of the natives have obtained experience in the reindeer

industry. Some of the Eskimos have remained fairly constantly in the herding work and have become proficient herders. Others prefer to engage in trapping when returns are favorable.

Reindeer are supplied to trained natives and assistance is provided in establishing herding units in locations separated from the range of the main herd. As the reindeer herd increases in size under protection, animals equal to the original stock are to be returned and the remainder will be the property of the herd managers.

The primary purpose of the reindeer industry in Canada is to provide the Eskimos with a means of livelihood which will augment and conserve the game resources on which they depend for subsistence.

The extent to which reindeer herding may be developed in northern Canada as an industry for the natives depend largely on whether a sufficient number of these people accept the herder's mode of life.

Reindeer wander extensively during their grazing but with herders in attendance will remain on the range allotted to them. There is a noticeable tendency for reindeer to remain on their home range if pasturage is suitable. They are free from the habits of the wild caribou in respect of wide migrations. It is the practice on the Canadian range to keep the reindeer on the coast or near the larger lakes in the coastal area in the summer. During the winter they move 50 to 75 miles inland where the reindeer moss is abundant. The summer diet of these animals includes a wide variety of plants, such as grasses, shrubs, and mushrooms.

Experience has shown that reindeer herds cannot be successfully maintained without the protection of herders. Losses caused by straying and predators tend to reach serious proportions unless there is efficient herding.

### Timber Industry's Gift

The main entrance to the Festival of Britain Exhibition next year is to be roofed with laminated timber arches shaped like a parabola, each arch containing 25 separate layers of wood. Made from wood specially presented to the Festival by the British Columbia timber industry, they are the largest arches of this kind ever constructed in Europe.

The frog's tongue is rooted at the front of its mouth.

## On The Side : By E. V. Durling

### The Perfect Stenographer

A New York executive of many years experience says young women with "gray-green" eyes make the best secretaries. Brown-eyed girls, he says, are the least efficient in that position. Not because they lack intelligence but because if they are single they are always looking around for or thinking of matrimonial prospects. And if they are married they are always worrying about their husbands. However, he prefers married women over single women as secretaries. He claims the best secretaries are tall, gray-green eyed brunettes of Scotch-Irish descent who have been married at least three years.

### Side-Line Of A Film Star

As a side issue to her film activities, Constance Cummings, British star, runs a second-hand clothes shop for children in London. She is doing very well with it. Seems an extremely good idea. If your wife is thinking of going into business for herself have her consider such a shop.

### Turkish Bath

Do you know who David Urquhart was? He was the man who originated the "Turkish bath". It was based on bathing practices he had seen while living in the Far East. Was first introduced in England in 1862. I have never tried a Turkish bath. Maybe I will do so soon. Seems it should be a part of everybody's experience.

### Earthquake Warning

Are you the possessor of a goldfish? Has it ever shown any signs of intelligence? I never could work up any enthusiasm for goldfish. If you ever think of acquiring another pet fish why not get a South American neon tetra. This is a tropical fish; red, white and blue in color. Another interesting tropical fish is the Midnight Mollie. Consider how much more interesting it could be to own a fish with a name like that rather than a goldfish. If you live in an area where there are occasional earthquakes you should get yourself a Japanese earthquake fish. This fish gives a warning when an earthquake is imminent. At such a time it starts thrashing around the bowl in a very excitable manner. Of course, at night this fish might not thrash around loudly enough to warn you of the coming of an earthquake. However, as I stated in previously mentioning this funny marvel, you could attach one end of a string to the fish's tail and another to your toe—then when it thrashed around in warning it would wake you up.

### Among The Married

Now some experts on life among the married are claiming having the honeymoon immediately after the wedding is not a good idea. In support of this claim they say only about one bride in five really enjoys a honeymoon. How about you, sister? Can you class your honeymoon trip as one of your life's happiest experiences? Anyway, those opposing the after-wedding honeymoon say the young couple is too weary to enjoy the first couple of days of it. However, despite their fatigue, they try to act full of pep, feeling that to act otherwise on a honeymoon would not be right. Also on the honeymoon the couple begin to discover little things about each other they do not like.

### Hot Baths — No Rheumatism

Tokyo has over 2,000 public baths. In these over a million Japanese bathe daily. The Japanese bath is an extremely torrid affair. It is so hot the average American couldn't stand it. In view of the Japanese enthusiasm for hot baths it is interesting to note that rheumatism is almost unknown in Japan.

**YOU'RE TELLING ME** By **WILLIAM RITT**  
Central Press  
Canadian Writer

Washing dishes, says a medico, makes a man feel youthful. And he doesn't like it a bit more than he did when he really was young!

A western burglar wore a false nose and specs. Probably believes in leaving his victims laughing.

Mount Everest, world's biggest mountain, is getting bigger — say scientists. Them that has gets.

A lion which invaded a terror-stricken African community was found to be toothless. Probably just came to town for new bridge work.

The army is looking for a method of avoiding leaving tracks in snow. Easy—use an airplane.

A New Mexican housewife captured, via a vacuum sweeper, a swarm of bees which invaded her home. A honey of an idea!

British Columbia has a half-million acre ranch. There's one place where the Lone Ranger would really be lonely.

One chap says he's worn the same hat for 35 years. A great recommendation for the restaurant he hangs it up in.

## World Happenings Briefly Told

Italy has signed a contract with Russia to buy 200,000 tons of Soviet wheat, an Italian foreign ministry bulletin said. The price was not disclosed.

Marshal Tito has ordered a 10 per cent slash in bread rations throughout Yugoslavia owing to a severe drought. Exports of corn have also been stopped.

Natives of the Pacific islands which the United States captured from Japan during the Second World War "want to live forever under the American flag", a report to the United Nations said.

Millions of peculiar insects — half ant and half gnat — have invaded mountain districts of western Norway, baffling experts who have so far been unable to identify them. They don't bite but creep into clothing.

Denver, Colo., has the distinction of the world's highest modern fire alarm headquarters say field engineers of the Gamewell Co., who installed it. The new central station sits on the highest point of the Mile High City—at 5,402 feet above sea level.

#### Answer To Last Week's Puzzle

### PRISCILLA'S POP—Win! Place: Show

### Urge Alberta Potato Growers To Exhibit

EDMONTON — Alberta potato growers were urged to enter their best products for competition in Toronto's Royal Winter Fair.

William Lobay, supervisor of crop protection for the Alberta department of agriculture, said potatoes are assuming an increasingly important place among Alberta's crops. This year nearly 13,000 acres were planted for commercial purposes and potatoes for home use were grown on another 15,000 acres.

### Alberta Boy Scouts To Attend Jamboree In Austria, 1951

EDMONTON — Two Alberta Boy Scouts will be included in the troop of 32 scouts and three leaders who will attend the seventh world Boy Scout Jamboree in Austria, Aug. 3-13, 1951. Names of the boys will be decided at a meeting later this fall of the provincial division, Boy Scout association.

### Jasper Place Wants To Be A Town

MEDICINE HAT — Mayor J. M. Stone of Jasper Place announced the village of Jasper Place, a suburb of Edmonton, would apply for incorporation as a town.

W. F. Broadstock, secretary-treasurer of Jasper Place, said the "village" of some 10,000 persons is faced with serious municipal problems in servicing a population which is greater than in some of the cities of Alberta.

### WAKE UP YOUR LIVER BILE—

Without Calomel—And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out about 2 pints of bile juice into your digestive tract every day. If this bile is not flowing freely, your food may not digest. It may just decay in the digestive tract. Then gas builds up your stomach. You get constipated. You feel sour, sunk and the world looks punk.

It takes those mild, gentle Carter's Little Liver Pills to get these 2 pints of bile flowing freely to make you feel "up and up." Get a package today. Effective in making bile flow freely. Ask for Carter's Little Liver Pills, 35¢ at any drugstore.

### KITCHEN MEDITATIONS

#### A WORD TO SMALL TREES

By JANE DALE

The little trees which bend before the wind stand alone along the fence rows; they stand stooped forward like children with their cloaks thrown up over their heads. Each year they grow sturdier and their branches, like arms, are flung upwards towards the sky until by and by they catch the nearest clouds. Proud indeed they seem when robins build nests among their thickening branches, and when children stop beneath their shade to rest from boisterous games. The small trees along the fence rows grow in grace from year to year and become one with the changing scene.

The Gecko lizard washes its eyes with its tongue.

**SIMPLY GREAT**  
to relieve 'PERIODIC'

## FEMALE PAINS

Also nervous distress several days 'before'

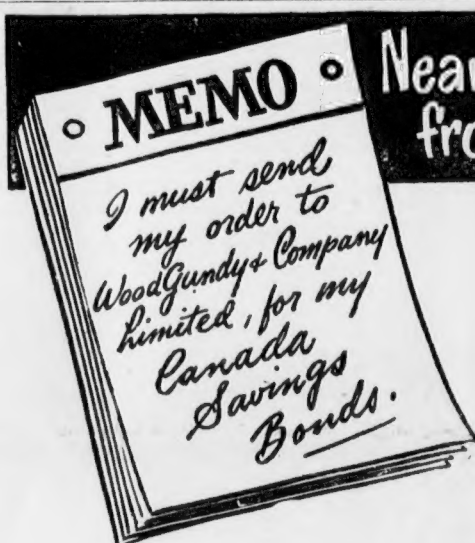

Do you suffer from monthly cramps, headache, backache—or do you, like so many women, start to suffer a few days just before your period from strange, nervous, restless, weak, dragging feelings—due to this functional cause?

Then start taking Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. Pinkham's Compound has such a comforting antispasmodic action on one of woman's

most important organs. Pinkham's Compound not only relieves this monthly pain but also annoying pre-period nervous, tense emotions of this nature. Regular use helps build up resistance against such female distress. Women by the thousands have reported amazing benefits. (Truly the woman's friend!)

NOTE: Or you may prefer Lydia E. Pinkham's TABLETS with added iron.

**LYDIA E. PINKHAM'S Vegetable Compound**

## The Spread In Grades

★  
An effort is being made by the grain trade to make it appear that the Wheat Pools are responsible in some degree for the spread in prices between the grades of wheat put into effect by the Wheat Board this year. The Alberta Wheat Pool denies any such responsibility. No member of the Wheat Board ever discussed with the Alberta Wheat Pool the question of spreads between the grades.

The fixing of the spreads between the grades is the responsibility of the Wheat Board. That Board has made it clear, however, that when the final payment is made all the monies received for each grade will be paid out to the producers.

## Alberta Wheat Pool

### MAN POISONS SNAKE

Driving along a side road near Low Gap on Holston Mountain, in the Cherokee National Forest in eastern Tennessee last spring, my friend Bill Paddock saw an old man standing at the side of the road, prodding something with a long walking stick. Bill stopped to investigate and offer the mountaineer a ride. When he stepped down from the car he discovered that the old man was poking and teasing a big timber rattler which lay in a tight coil a few feet from the wheel tracks.

"Go ahead and kill him, and I'll give you a lift up the road," Bill offered.

"Don't be in a hurry," the old man retorted. "There's a proper way to kill a snake. I'll take care of it in a few minutes."

Bill was sufficiently curious to wait and see what was going to happen.

The mountaineer went on with his prodding and tantalizing and the snake's anger mounted. It drew itself up into tighter and tighter loops, rearing its head higher from the ground, a terrible coil of lethal rage. At last it drew back and opened its mouth to full width in desperate fury, frantically seeking a chance to strike.

Instantly the mountaineer whipped two fingers up to his mouth parted and lifted his handlebar mustache, and let go a heavy charge of tobacco juice.

Bill had seen spitting contests between old-timers of those hills, and he had no doubt of the spitter's accuracy. But he certainly did not anticipate the result.

The mountain man struck the target at squarely as if he were shooting squirrel rifle. The infuriated snake got a mouthful of tobacco juice smack down his throat.

It whipped out of its coil as if it were burned with a red hot poker and rolled over and over a dozen times, writhing in obvious agony. Suddenly it stiffened out, belly up, and its struggles ended. The snake was stone dead, rather in a

matter of seconds by a severe case of nicotine poisoning!

"Ain't no sense in beating a snake to death with a club," the old man remarked as he turned toward the car. "This here's a quicker way, and cleaner."

Bill suspects he considers it more fun, too.

I have checked with other mountain men since, and two or three of them have assured me that this is a fairly common method of disposing of a rattlesnake or copperhead in the Unakas and Great Smokies. Death for the snake is certain and swift, they say, if it can be persuaded to open its mouth—and if the spitter can hit the bullseye.

—Ben East in Outdoor Life.

People usually get at odds with one another when they try to get even.

### SAFETY IN THE SWIM

Swimming is one of the finest forms of exercise available, but swimming alone or in unknown waters can be dangerous. Keep your name out of the casualty reports by observing the simple safety rules. Remember, don't swim alone, don't swim in unknown waters where there might be currents or undertow. And don't dive into unknown waters.

Daughter: "Father, can my new boy friend replace your business partner that died yesterday morning?"

Father: "It's all right with me—if you can arrange it with the undertaker."

Mother: "Son, I hope your room mate at prep school doesn't swear."

Son: "Judge for yourself, Mother. The other night he stubbed his toe in the dark and shouted, 'Oh, the perversity of inanimate objects.'"

## WAIT!

IF YOU ARE IN DOUBT ABOUT PASSING

Passing another car is a manoeuvre that requires the good drivers' full concentration. Do not attempt to pass unless you have visibility of the road ahead and no traffic is approaching. Allow plenty of room to pull out, pass, and return to the proper lane. Cutting in too sharply may doom both yourself and the driver you have passed.

# YOU'LL BE YEARS AHEAD WHEN YOU ROCKET AHEAD IN AN OLDSMOBILE

JUST NATURALLY, the car that started first, is the car that's ahead right now in the march of motoring progress! Yes, Oldsmobile brings you the benefits of its extra experience in such revolutionary advancements as Hydra-Matic Drive\*—the pioneer no-shift drive that's finest because it was first in the field, and has been proved and improved through actual billions of miles of driving in the past ten years!

The great new Oldsmobile "Rocket" Engine is another first from the continent's most experienced car maker. Pioneered two years ago, it has already started a major automotive trend toward valve-in-head engines of much higher compression—but the "Rocket" is by far the greatest because it's first, it's backed

by many more years of research, development and perfecting!

And all through every model of the 1950 Oldsmobile "88" and the "76", powered by its improved "Big Six" Engine, there's example after example of Oldsmobile quality leadership . . . advantages that come to Oldsmobile owners because Oldsmobile, the car that was first in the field of all cars made on this continent today, has the good habit of keeping the lead!

So, go ahead—go years ahead—with an Oldsmobile!

**\*HYDRA-MATIC DRIVE . . .** The truly automatic drive that outmodes the clutch pedal entirely! Proved by billions of miles of driving since Olds pioneered it more than 10 years ago. So simple, so relaxing . . . such a thrill! Standard equipment on Rocket-Powered Olds "88", optional at extra cost on "76" 6-cylinder models.

Westerners Among Missionaries Going to India

These eight United Church missionaries are en route to various church missions in central India. Composed of evangelists, nurses and one doctor, the group comes from Nova Scotia, Quebec, Ontario, Manitoba and Alberta. Left to right, front row, are: Miss Dorothy Pearson, Toronto; Miss Lillian Johnson, Nova Scotia; Miss Dulcie Ventham, Ayr, Ont.; Miss Faith Weber, Preston, Ont. Back row, left to right: Miss Gladys Thornber, Montreal; Miss Frances Taylor, Edmonton; Dr. Merle Patterson, Winnipeg, and Miss Grace Smith, Glenboro, Manitoba. They sailed from Montreal.

For Better Trade

A three-man grain commission left Montreal recently on board the Canadian Pacific liner Empress of France en route to the United Kingdom and Western Europe. The three men will call on the grain trade, millers and government authorities with a view of facilitating trade in Canadian grain in that area. The men are (left to right) R. W. Milner, commissioner of the board of Grain Commissioners for Canada; J. B. Lawrie, executive assistant to the Canadian Wheat Board, and Dr. C. F. Wilson, director of the wheat and grain division of the department of trade and commerce.

SOUVENIR OF ARCTIC MISSIONARY — Nurse-missionary in Canada's far north for 17 years, Mildred Rundle brings back a souvenir on a furlough to Simcoe, Ont. The souvenir is a polar bear rug.

PREMIER E. C. MANNING

**ALBERTA OIL HEADS EAST—** Alberta crude oil began the first leg of its long journey into eastern Canadian markets, when Premier E. C. Manning of Alberta opened the valve at Edmonton to send the oil flowing into the newly completed pipeline between Edmonton and Regina. Completed just six months after construction began, it represents the first lap of a 1,127-mile pipeline from Edmonton to Superior, Wis. The whole line is expected to be completed this fall, and lakes freighters will begin to carry the crude oil to eastern refineries in the spring.

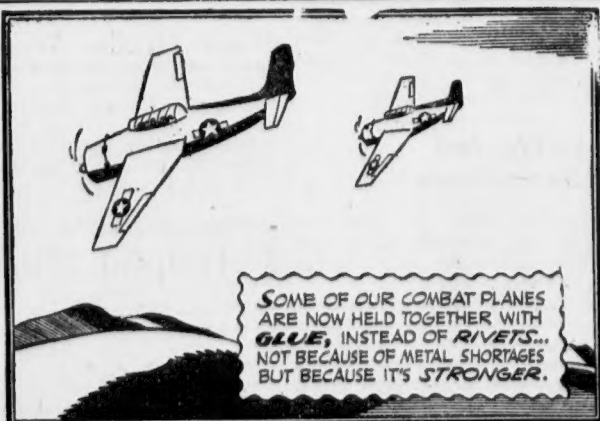

**WORK OF RECONSTRUCTION BEGINS —** Korean civilians are shown clearing away street barricades in Seoul as they start restoration of their newly liberated city. They got to work tidying up the South Korean capital as soon as U.S. Marines pushed on in hot pursuit of the fleeing Reds.

**BEAUTY SETS THE EXAMPLE —** Fuziko Yamamoto, who is "Miss Nippon" of 1950, manages to keep on looking beautiful while she is giving some of her blood for United Nations forces in Korea. The photo was made at a Tokyo laboratory where donations are received for the drive sponsored by the Japanese Red Cross.

# FARM MECHANICS

Edited by Prof. L. G. Heimpel  
Agricultural Engineer, Macdonald College, Que.

## Good Farm Water Supply

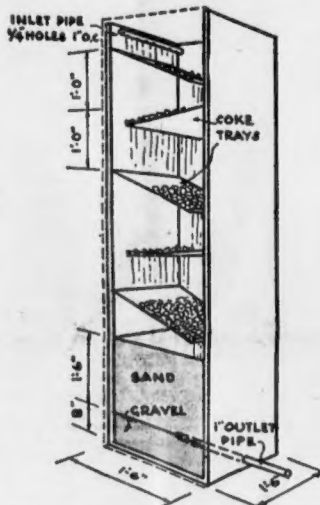

The bulletin contains a number of diagrams to simplify the construction of various installations to improve the water supply such as this cross-section drawing of a concrete filter for rain water.

**T**REATMENT of farm water supplies is thoroughly discussed in a handy booklet put out by the Prairie Rural Housing Committee and sponsored by the governments of the three prairie provinces and by the Central Mortgage and Housing Corporation. The contamination of water supplies is frequently the cause of serious epidemics such as typhoid, and dysentery.

The source of contamination of well water, it was pointed out, is surface seepage, and to avoid such contamination the well should be on ground higher than the surrounding area and the top 10 feet of the well lining should be impervious so that no seepage, gophers or mice may get into it.

Naturally the well has to be tight-

One of the many drawings in the farm water supply bulletin depicts an aeration tower for removing iron from water.

ly covered so that no dirt can fall into it. "The Old Oaken Bucket" may be alright for poetry, but the rural housing committee does not approve of using a pail to bail out water; a pump is definitely indicated. A drainage ditch should be dug above the well site to keep out surface water, if the well is on sloping ground. Stock water troughs should be outside a fence around the well and draining should be away from the well, says the report.

In case there is any doubt a sample of the water can be sent to one of the provincial health laboratories, but a specially sterilized bottle should be secured for this purpose and these bottles are available on request.

Information is also given as to the use of sand filters for purifying the water and details on construction of such a filter are shown. Also, information is given regarding the treatment of excessively hard water and the removal of unpleasant tastes in the water which are usually caused by decayed organic matter.

In many parts of the prairies dug-outs are the sole source of drinking water both for man and animals, as well as for irrigating the garden. Filters can be used in these dugouts to ensure good water.

Attention is drawn to the fact that more use can be made of the supply of rain water. Proper storage of this soft water could go a long way to help out the farmer whose ordinary supply is of very hard water. The average rain fall over the greater portion of the prairie provinces is about 12 inches a year, which means that each square foot of roof would contribute over six gallons of soft water a year. Here again filters may be used to remove the dirt which may be washed in from the roof and eavestroughs.

Copies of the bulletin can be secured by writing to Prairie Rural Housing Committee, care of the Alberta, Saskatchewan or Manitoba governments, depending on the province in which the inquirer resides.

To Live Right — Eat Right.

It's the best ever—our latest Alice Brooks Needlework catalogue! Send twenty-five cents in coins for your copy. Illustrations of designs for crocheting, knitting, embroidery, toys, quilts, children's clothes. Free needlework pattern is printed in book.

## New Brick Plant at Estevan To Produce Next Spring

Announcement that a new \$400,000 brick plant will be built at Estevan has been made by Hon. L. F. McIntosh, chairman of Saskatchewan Minerals, Clay Products Division. He hoped the plant would be producing brick by the opening of the 1951 building season.

Of the latest design, the new plant will be of the closed-in tunnel kiln type, and will operate all year around. The present open kiln plant can only operate from six to eight months per year, being forced to close down during the winter. Approximately 50 men will be given permanent full-time employment in the new plant.

Estimated yearly production capacity of the new plant is 20,000 tons of brick and tile. This means that the new plant will be able to turn out 10,000,000 bricks per year, compared to the old plant's maximum production capacity of 5,000,000 bricks if operating the year round. The plant

will use Saskatchewan clay obtained in the Estevan area.

C. J. Ward will continue as general manager of Saskatchewan Minerals, and Thomas Mooney will carry on as plant superintendent at Estevan.

There is a keen demand for brick, Mr. McIntosh added, and shortages have led to hold-ups in many building projects. The Estevan plant sells its products as far east as Fort William. A campaign to encourage prairie people to build their homes from Saskatchewan produced brick will be undertaken when the new plant starts production.

The present Estevan brick plant was purchased by the Saskatchewan government in 1944 from International Clay Products.—Canadian Finance.

## New Dam To Irrigate 3,500 Acres

REGINA — A water storage reservoir on Russel creek near Pambrun, Sask., is now under construction by the P.F.R.A., officials in Regina have announced. Pambrun is 38 miles southeast of Swift Current.

The work, being done by Forbes Construction Co. of Regina, is expected to be completed in about three weeks at a cost of \$58,000.

It is estimated the dam will irrigate approximately 3,500 acres and in addition will provide a stream for watering stock during dry seasons.

Similar projects are underway on Clarke creek near Willowbunch and on Ross creek at Walsh.

Smaller projects include a dam on MacDonald creek near Mankota for the Borden Grazing association and for the Round Hill Water Users' association.

## May Get Loans To Build Homes

CHURCHILL, Man.—Building loans have come to far north Churchill. Previously the house-builder had to finance all the cost as the land was owned by the province and lots were leased to residents. With a change of policy the lots now are offered for outright purchase. Central Housing and Mortgage corporation has approved loans to two purchasers of lots and both plan to erect prefabricated houses.

It is expected the town will see a face lifting now that a man can erect a costlier building than his bank account will purchase.

## Who Lived In Alberta Before The Indians?

CALGARY — Who lived in Alberta before the Indians?

Retired rancher J. W. Dick of Calgary, who has made a study of rock paintings found in the province, believes Alberta's first residents may have been a prehistoric race which had an alphabet similar to one used by early inhabitants of the Middle East.

Most of these written characters were found in the "mystic cave," near the Porcupine Hills of southern Alberta. These characters, Mr. Dick says, resemble script of the Sabaeans nation which lived near the Red Sea in King Solomon's time.

## Books Wanted For Servicemen

OTTAWA —(CP)—The call went out for thousands of books for Canadian servicemen on duty at home and abroad.

The Canadian Legion educational services are undertaking the immediate supply of books for the forces. Canadians were asked to send them to the Canadian Legion book depot, Ottawa.

Magazines or newspapers are not needed.

## Rewarded For Heroism

MEDICINE HAT, Alta. — For an act of heroism here last summer seven-year-old Billy Hazard, son of Mr. and Mrs. Wm. Hazard, was presented with a watch by "The Good Deeds Club" Calgary. Billy saved Bonny Jean Gray, 2, from drowning at Robertson pool, before a small crowd of spectators, who were unaware of the near tragedy until Billy had the girl safely out of the water.

The hair of persons constantly handling crude aniline often turns a reddish brown.

—Central Press Canadian.  
**ANOTHER VICTORY FOR THE R.A.F.**—A horticultural show in London, Eng., had the R.A.F. numbered among the contestants. And their entries, an example of which is this outsize celery, took several prizes.

## Oddities In The News

The mother agreed that her children should conserve Regina city's water but she wasn't happy about their substitute.

The two kiddies were playing "cops and robbers" and were using water pistols as weapons.

When the mother scolded them about wasting water, one answered brightly:

"It's okay mom, we're using ink!"

Long Beach, Calif., should be an unhealthy place for criminals from now on. A new detective team is Goforth and Ketchum—Paul Goforth and Bruce Ketchum.

A five-year-old boy of Garden City, Pa., saved his uncle from drowning in a grease pit. The uncle is also five.

Accidents have been reduced by 50 per cent, since a cage containing a pair of monkeys and a baboon was set up in front of a plant at Anniston, Ala. A sign on the cage reads: "Don't monkey with safety and make a baboon of yourself."

The prize in a Battle-of-Britain anniversary competition was free haircuts for three months. The winner, at Spalding, England, was W. J. Thompson, a barber.

A witness in a Toronto court case testified that the woman complainant had been acting "like a wild Indian."

Then in sudden confusion, he looked up at Magistrate O. M. Martin. The magistrate is a full-blooded Indian.

"What was that expression?" the Magistrate snapped.

"I'm so sorry, your worship," the witness said. "I humbly apologize for my remarks."

"She might have been acting like a wild Irishman, Scotsman, or something like that," the Magistrate suggested. "Isn't that what you intended to convey?"

The witness agreed.

## Smile Of The Week

"Have you ever driven a car?" the lady applicant for a license was asked.

"One hundred and twenty thousand miles," put in her husband, "and never had a hand on the wheel."

## Helpful Hints

If your card table top is worn, glue a bright piece of linoleum over it.

When a drawer will not slide in and out easily the underside and runners of the drawer should be well greased with furniture polish.

If your teapot spout has become discolored pack it tightly with damp salt and leave overnight. Then empty and scald.

Table silver should be washed promptly after use and it will resist tarnish. Wash each piece separately with a soft cloth in hot, soapy water. Rinse in warm water and dry with an absorbent towel.

Tommy Loughran, who boxed from 1919 to 1937, beat four opponents who became heavyweight champions yet never was champion himself.

## OUR COMPLETE SHORT STORY—

## INTELLIGENCE

By F. R. JONES

Johnny Couldn't Understand  
What He Found.

"CAN'T you ever do anything right?" Mr. Martin said angrily. Johnny looked at him with his usual puzzled expression. Then he turned and looked at the two big cans of paint on the floor.

"You said for me to bring . . ." he began.

"I told you to bring two gallons of flat white," Mr. Martin said. "That's glossy white you've got there."

Johnny stared at the cans, as though somehow they had changed while he was bringing them up from the basement. Johnny was nineteen and he had been working for Mr. Martin for three years, sweeping out the store, keeping the basement clean and lending a hand with the heavy items. But it was hard for him to remember things and he made a lot of mistakes.

"Take it back," Martin said. "And don't forget to clean up those rags down there. You shouldn't leave them lying around. It's dangerous."

A customer came in and Martin hurried to the front of the store. Johnny stood looking after him, then picked up the cans and went down the stairs.

That night, after the store was closed and Johnny had gone home, Martin sat for a long time in his little office at the back, staring at his books and bills. Finally he shook his head. No use checking any more. He was through. And so was his business.

One too many hardware stores in town, he thought bitterly.

Well, he'd done all he could. He'd let the clerks go, one by one, until now he ran the store alone except for Johnny. He'd kept hoping that things would pick up, that somehow he'd get his share of customers. He might barely be able to meet the rent for another month, but what about all these other bills? They'd force him into bankruptcy, and he'd lose his car, his house, everything.

His mouth hardened. They weren't going to do that to him. It hadn't been his fault—just bad luck. But to lose everything . . .

It was late when Martin let himself out. His plan was set. There would be nothing strange about a fire in a store full of paint and oil. Happened all the time. And if anybody did suspect, it would be easy to shift the blame to the boy.

Funny, how he'd been sore when he'd seen that Johnny had forgotten to clean out those oily rags again!

He had thought of starting the fire that night. Too dangerous. Somebody might remember his late light. Tomorrow was Saturday. Much better.

As Martin was waiting on a customer the next day Johnny came up with his broom and began sweeping behind the counter.

"Say, Johnny," Martin said loudly, "get those rags out of the basement. I told you before."

"Sure, Mr. Martin," Johnny said, and went on sweeping.

Martin winked at the customer. "Johnny kind of forgets things," he said.

The store kept open late Saturday, and it was after ten when he went down to the basement. Johnny had forgotten the rags again! 2903

He poured the kerosene and lit the candle. The candle light couldn't be seen outside. By the time it burned down and the fire started it would be ten in the morning—Sunday morning. And there'd be nothing left to show how it started. Now, home to bed. The insurance money was as good as in his pocket.

Martin answered his door Sunday morning. It was a detective.

"What happened?" he blurted out. "Nothing—thanks to that boy."

"Johnny?"

"Yeah, kind of dumb. He forgot this was Sunday, on account of he was in a stew about something he was supposed to have done at the store. He went back this morning. Went in through a basement window. Couldn't understand what he found so he called the cop on the beat. He understood, though, Mr. Martin. He understood fine."

## DID YOU KNOW?

It never gets too cold to snow, but it frequently gets too cold for snow to fall in "flakes".

To Live Right — Eat Right.

## WESTERN BRIEFS

## Asbestos Industry

VANCOUVER.—Establishment of an asbestos industry in British Columbia is the objective of a new company whose formation was announced.

## To Build New Home

KIMBERLEY, B.C.—George Buchanan, 84, whose home was destroyed by fire recently, knows that he has friends. Members of the Kimberley Rotary Club will build him a new home.

## Timber Wolves Near Village

INWOOD, Man.—Two timber wolves are on the prowl in this district. They were seen recently by John Andstrom in a field east of Inwood, owned by Fred Brunger.

## No Senior Entries

VICTORIA.—Senior "A" basketball is a thing of the past in Victoria this year. No senior entries have been received by the Victoria and District Basketball Association.

## \$4,270,010 In Betting

WINNIPEG.—Race fans bet \$4,270,010 at the spring and fall racing meets at Winnipeg's Polo park and this gave the Manitoba government \$420,045 in tax revenue, a treasury official said.

More than 84 animal diseases also affect man.

## B.C. Sets Tourist Record

VICTORIA, B.C.—Tourist travel to B.C. for the first eight months of 1950 established an all-time record, the government travel bureau said. Number of cars issued travellers' permits across the border into the province numbered 159,133, compared with 155,045 in 1949.

## Permanent Museum

THE PAS, Man.—A permanent museum for The Pas was announced at council meeting by a delegation from the Northern Manitoba Trappers' festival, which sought and obtained permission to use Davon Park pavilion in which to establish a museum.

MACDONALD'S  
BRIER

Canada's Standard Smoke

Baking's Easier, Speedier  
with Wonderful New Fast Rising Dry Yeast!

## CINNAMON BUNS

Measure into large bowl, 1 c. lukewarm water, 2 tsps. granulated sugar; stir until sugar is dissolved. Sprinkle with 2 envelopes Fleischmann's Royal Fast Rising Dry Yeast. Let stand 10 min., THEN stir well. Scald 1 c. milk and stir in 1/2 c. granulated sugar, 1/4 tsp. salt, 6 tbs. shortening; cool to lukewarm. Add to yeast mixture and stir in 2 well-beaten eggs. Stir in 3 c. once-sifted bread flour; beat until smooth. Work in 3 c. more once-sifted bread flour. Knead until smooth and elastic; place in greased bowl; brush top with melted butter or shortening. Cover and set in warm place, free from draught. Let rise until doubled in bulk. While dough is rising, combine 1/2 c. brown sugar (lightly pressed down), 3 tsps. ground cinnamon, 1 c. washed and dried seedless raisins. Punch down dough and divide into 2 equal portions; form into smooth balls. Roll each piece into an oblong 1/4" thick and 16" long; loosen dough. Brush with melted butter or margarine. Sprinkle with raisin mixture. Beginning at a long edge, roll up each piece loosely, like a jelly roll. Cut into 1" slices. Place just touching each other, a cut-side up, in greased 7" round layer-cake pans (or other shallow pans). Grease tops. Cover and let rise until doubled in bulk. Bake in moderate oven, 350°, 20-25 minutes. Serve hot, or reheated.

• No more taking chances with perishable yeast cakes that have lost their leavening power! New Fleischmann's Fast DRY Yeast keeps full strength and active right till the moment you use it. Needs NO refrigeration—keeps safely in your cupboard. Try its marvellous results in your next baking.

LINIMENTMORE  
HEAT  
FOR LESS  
MONEY!

Don't wait until next winter—now is the time to insulate! GYPROC WOOL Insulation enables home owners to save up to 30% in fuel costs, yet the house is kept warm and comfortable in spite of the coldest weather.

With GYPROC WOOL protecting your house, every bit of heat from your fuel is made to work—it is kept inside to warm you, instead of being allowed to escape through walls and roof to the outside.

GYPROC WOOL will give you comfort this coming winter—and

year after year, for GYPROC WOOL is the "Lifetime Insulation". It is mineral; does not deteriorate; is moisture-resistant and fire-safe; and permanently retains its insulating properties.

Write for a copy of "Insulation Manual", which explains how insulation works and shows how easily GYPROC WOOL may be installed in your home.

A G-L-A Product, made by Gypsum, Lime and Alabastine, Canada, Limited, and sold by Builders' Supply, Lumber and Insulation Dealers across Canada.

## LITTLE NEWS ITEMS OF LOCAL INTEREST

A meeting of the Carbon Curling Club will be held in the Village office on Friday, October 27, at 8 p.m. All curlers and prospective curlers are urged to attend.

The Zion Baptist Church will hold its annual mission festival on Sunday morning, October 29. The Carbon Baptist Church festival will be held the following Sunday, November 5, at 11 a.m.

Mr. and Mrs. A. R. MacAlpine and daughter, Lois, of Delia, arrived in Carbon Thursday and have taken up residence in the house formerly occupied by Mrs. Al Messmer. Mrs. MacAlpine will officially take over operation of the local telephone office November 1, when Mrs. Messmer leaves to reside in Calgary.

## Bang's Disease Control

In common with others throughout the province, farmers of the Kneehill municipality are now invited to take part in a voluntary campaign to determine the health status of their herds — so far as Bang's disease is concerned — and to take steps to ensure that their herds of the future are disease-free.

The first can be accomplished by having blood tests taken of all dairy cows, including particularly all cows used for home milk supply, since Bang-infected cows can transmit Undulant Fever to human beings; the second by vaccination of all heifer calves, whether dairy or beef, destined for herd replacement. Vaccination between 4 and 9 months only is found effective and practical.

If you are interested in the above, whether you own one cow or 50; you are asked to list a request for service immediately at the M.D. office, Three Hills, (or with S.F. Torrance, J.A. Ohlhauser or N.F. Bell) together with the number of vaccinations and blood tests required. Talk this over with your neighbor and have him do likewise. The law requires that the above work be done by a licensed veterinarian. The services of Dr. Peppin of Drumheller are available but his time is in heavy demand. Costs of the service, but not of the vaccine, have to be met by the applicant. By cooperation and organization these can be kept at a low figure within the reach of everyone. Do your part to ensure this by early listing. Further information is available on request.

This campaign is sponsored by your Agricultural Service Board and the Alberta Department of Agriculture. Already a considerable number of animals have been tested in the Three Hills, Trochu, Acme and Carbon areas, but other lists are in the course of preparation.

W. D. GENTLEMAN,  
Kneehill Agricultural Service Board

### UNWANTED HAIR

Eradicated from any part of the body with Saca-Pelo, a remarkable discovery of the age. Saca-Pelo contains no harmful ingredient, and will destroy the hair root.

LOR-BEER LABORATORIES  
679 Granville St., Vancouver, B.C.

### TENDERS INVITED

For the purchase of the School barn in the Mosher S.D. 3426. Tenders will be opened and considered Friday, November 17, 1950. Building to be removed from school grounds. Envelopes to be marked "Tenders." Highest or any tender not necessarily accepted.

Albert W. Poland,  
Secretary Treasurer,  
DRUMHELLER SCHOOL  
DIVISION No. 30,  
Box 570, DRUMHELLER, Alta

Mr. and Mrs. Bob Greenhail of Calgary are visiting at the home of Mr. and Mrs. Fred Bessant.

The Diocese of Calgary is now sponsoring the Anglican Sunday School of the Air. This program is heard over CFCN every Sunday morning at 9 a.m. Tune in on Sunday mornings for an instructive and entertaining program especially arranged for children.

## Farmers' Meeting Monday

Don't forget the big farmers' meeting in the Carbon Scout hall Monday evening, October 30. Special speakers who have been asked to attend are Carl J. Stimpfle, F.U.A. president; C. E. Johnston, M.P., Bow River; H.G. Hammell, M.L.A., Didsbury; and G. E. Taylor, M.L.A., Drumheller. Be sure to attend.

FOR SALE—Two room House & 2 lots. Apply to Mrs. C.H. Nash

FOR SALE—Lady's Speed Skates, size 6, practically new. Apply Box 89, Carbon.

### IN MEMORIAM

In loving memory of a dear Mother, Louisa, who passed away October 30, 1948.

Do not ask us if we miss her,  
For there's such a vacant place,  
Oft we think we hear her foot-steps

Or see her smiling face.

For she left us broken-hearted,  
Friends may think the wound is healed,

But they so little know the sorrow,

That is in our hearts concealed.  
Ever remembered by Ester,  
Albert, Rose and David Gleck

# THIS

# TANK

# NEEDS A FULL

# CREW

... and it takes time to train a tank crew: each man must know his job thoroughly; he must be an alert, skilled member of a fighting team.

The Armoured Corps of the Canadian Army needs keen young men today... men ready to train for a man-sized place in one of its tank crews:

tank drivers, gunner operators, vehicle mechanics.

Now is the time to report for training... make

Canada strong by acting now!

### To enlist you must —

1. Be a Canadian citizen or British subject.
2. Be between 17 and 29 years of age.
3. Be single.
4. Meet Army test requirements.
5. Volunteer for service anywhere.

### Report right away to:

No. 10 Personnel Depot, Currie Barracks, CALGARY, Alta.  
Headquarters, Western Command, Kingsway Ave., EDMONTON, Alta.
